

Providing future values on new or used vehicles

This system allows users to either **select an individual vehicle** or **compare up to 5 vehicles** with each other, in order to establish **what the vehicles value could be over a period of time**.

AutoRVF Features:

- Select **annual or quarterly points** up to **84 months**
- Do **kilometer adjustments**
- Build own **percentage risk factors** on each future value point
- Customized **residual value calculations** for **guaranteed buybacks** or **residual value plans**
- Calculating **payment plans on the future value** with inputs on **interest rates** and **deposits**
- See all **current manufacturer promotions**

Providing future value points on:

Retail Values

Trade Values (total into stock)

Cost Values

Auction Values

Information can be viewed **graphically**, **data in a table format** or even **exported to Excel**. A **PDF document** is available that will **draw a report based on the unadjusted and adjusted values based on the input**.

Residual value forecast in Rand
