

Reduce risk by accurately verifying and valuing a vehicle

A mobile App and website that enables users to **verify both a vehicle and a person**. The App, scans and decrypts the **barcode on a vehicle licence disc** and a **driver's licence card**, instantly returning **real-time, accurate verification information**.

Identify if the car is one you **want to trade-in** and if the person is someone you **want to do business with**, all in a matter of seconds.

Scan a Vehicle Only
Quickly capture accurate details on a vehicle

Scan a Vehicle and a Person Only
Useful to scan a driver's licence card before a test drive and link it to the vehicle the person is interested in

Scan and Verify a Vehicle
Full check and verification of vehicle

Scan and Verify a Person
Use before test drives to check affordability and risk score of a person

Scan and Verify a Vehicle and a Person
Full check and verification

Data driven analytics, market insight, vehicle information and compliance expertise to the South African motor industry.

A revolutionary solution that saves time and money

Benefits

- **Get real-time accurate data**
- **Reduce your risk** by understanding the vehicle and person in full
- **Simple, user-friendly, fast and efficient** method of **gathering information**, and **sending it to where you need it most**
- **Microdot information** helping **combat vehicle related crime**. Checking a vehicles microdots allows you to verify whether the VIN and engine details are all original and that the vehicle has not been modified after manufacture.

LIVE Features

Eliminate finger trouble by using LIVE's award-winning mobile App to scan a vehicle's licence disc, or type in the VIN number on the LIVE website. Instantly verify all of the important and need-to-know information while you are in front of the car.

Vehicle Verification offers accurate vehicle descriptions, validation of the VIN number, engine number, make, model and type. LIVE provides a vehicle's generic and specific features, various performance insights, warranty start date and financing status.

Our Financed Interest Information is the most accurate in the market, with information sourced in real-time. Our process is POPI compliant.

LIVE also provides police interests helping to verify if there is an open case registered against the vehicle's VIN number, licence plate or engine number as well as providing case numbers and the police station where the case was reported.

Trade and retail values on current year models, including a comprehensive list of vehicles available in the market. You can verify retail values against a list of the last 5 actual sales of a similar vehicle and adjust trade and retail values based on a vehicle's mileage and condition.

The App also takes photos of the vehicle which can be sent to potential buyers.

EzScore performs a basic affordability test on a potential customer, without performing a credit enquiry. It provides an indication of risk and financial affluence, estimating the person's likelihood to qualify for finance.

Scan a driver's licence card and verify a person's details. This allows for instant electronic processing of contact information, storing copies of driver's licences for test drives and form pre-population of finance applications, eliminating paper work!

Data driven analytics, market insight, vehicle information and compliance expertise to the South African motor industry.

Getting Activated

1. Go to auto.lightstone.co.za
2. Click on **“Sign Up”** and provide your details
3. Lightstone support will **email you an auto sign up document**
