

LIVE now offers more than a verification and valuation tool – we help you identify if a vehicle has been repaired

Features of the App

Repair History discloses whether a vehicle has been repaired, going back to 15 years' worth of information.

Scan allows for instant electronic processing of contact information, storing copies of driver's licences for test drives and prepopulation of finance applications.

EzScore performs a basic affordability test on a potential customer, without performing a credit enquiry. It provides an indication of risk and financial affluence.

The Financed Interest Information is the most accurate in the market, with information sourced in real-time. Our process is POPI compliant.

Trade and retail values on current year models, including a comprehensive list of vehicles available in the market.

Vehicle Verification offers accurate vehicle descriptions, validation of the VIN number, engine number, make, model and type.

Why LIVE?

Get real-time accurate data

Simple, user-friendly, fast and efficient method of gathering information, and sending it to where you need it most

Reduce your risk by understanding the vehicle and person in full

Microdot information helping combat vehicle related crime

Supports an ethical and transparent purchasing process and creates peace of mind
